

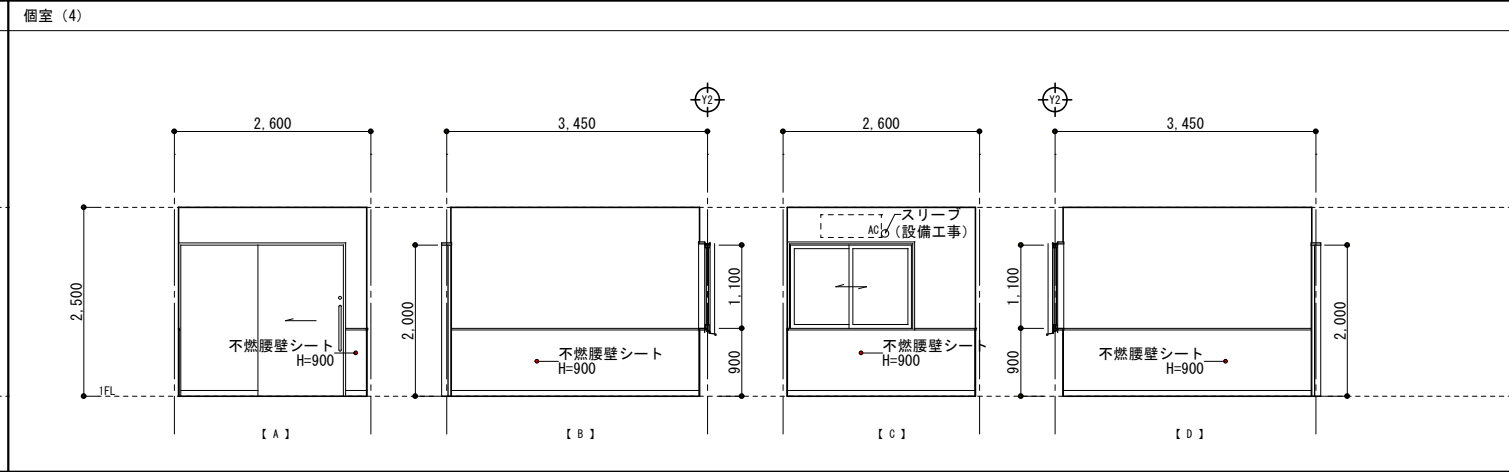

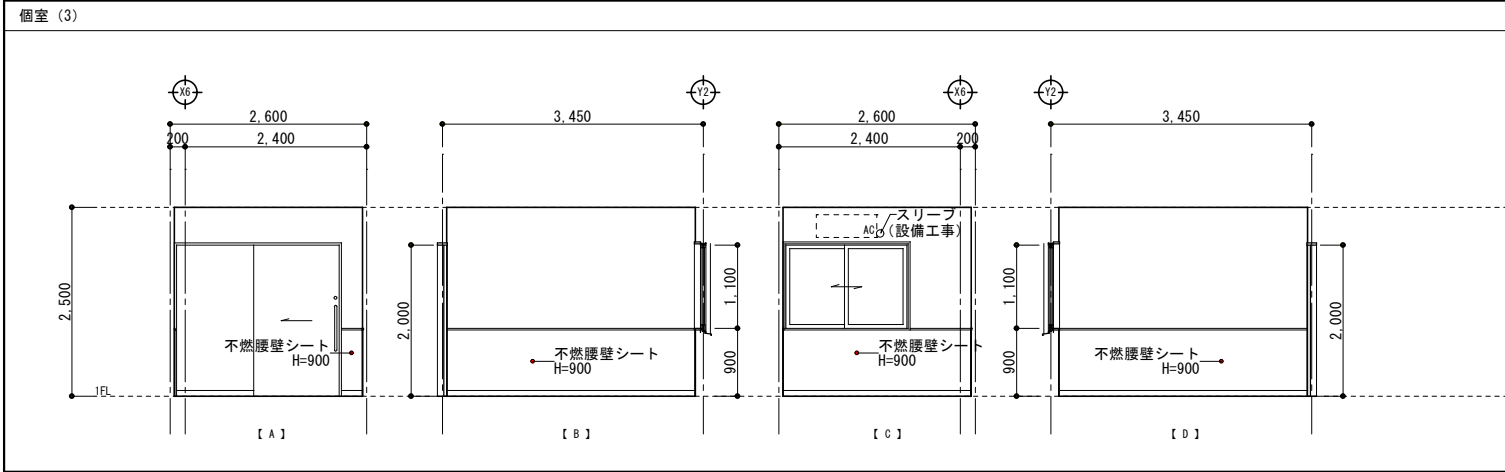

Figure 4 shows the elevation drawings of the four corners of the room, labeled [A], [B], [C], and [D]. The drawings illustrate the placement of non-combustible wall sheets (不燃腰壁シート) and the height of the sheets (H=900). The dimensions for each corner are as follows:

- [A]: Width 2,600, Height 2,500. The non-combustible wall sheet is located on the left wall.
- [B]: Width 3,450, Height 2,000. The non-combustible wall sheet is located on the bottom wall.
- [C]: Width 2,600, Height 2,500. The non-combustible wall sheet is located on the right wall. The AC unit (エアコン) is located on the top wall.
- [D]: Width 3,450, Height 2,000. The non-combustible wall sheet is located on the bottom wall.
